

CALL FOR PAPERS

Special Issue on “Engineering role in post-conflict reconstruction”
Vol. 14, No. 2, 2026

The **University of Khartoum Engineering Journal (UOFKEJ)** is pleased to announce a **call for papers** for a **special issue** focusing on engineering challenges and innovations in **post-conflict reconstruction contexts**.

This issue aims to highlight the vital role of engineering in supporting communities emerging from conflict through the development of innovative and sustainable technical solutions.

Researchers, academics, and professionals from around the world are invited to submit their **original research papers** addressing engineering challenges and solutions in the following areas:

- Assessment and rehabilitation of damaged structures
- Energy systems and electrical/mechanical infrastructure
- Communications and information technology for reconstruction
- Infrastructure and essential services in conflict-affected environments
- Urban planning and vital facilities
- Natural resource management and reactivation of productive sectors
- Innovation, reuse, and transformation in construction materials and technologies
- Occupational safety and health in post-war reconstruction sites
- Digital modeling and engineering analysis in fragile environments
- Forward-looking philosophies for planning and implementing reconstruction projects

Submission portal: [<http://uofkej.uofk.edu>]

Submission deadline: December 30, 2025

We look forward to receiving your valuable scientific contributions that enrich engineering knowledge and support development and stability efforts in post-conflict environments.

With sincere regards,

Prof. Sami M. Sharif
Editor-in-Chief
University of Khartoum Engineering Journal (UOFKEJ)
